SEPTEMBER 2019

New DENTAL X-Ray Machine

Our new dental X-Ray machines allows us to get a better view of your pet's teeth and dental health.

Summer Risks!

Rabbits

Flystrike

Flystrike happens when flies lay eggs on rabbits, usually around their bottom. The eggs then hatch into maggots which then eat their way into the rabbit's skin. Flystrike can be fatal.

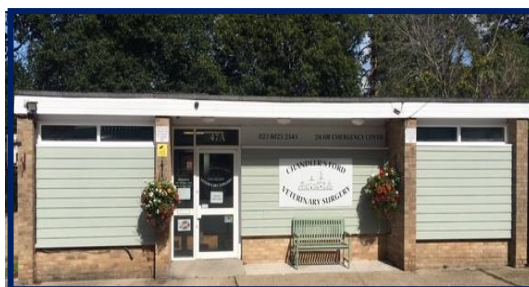

Flies are usually attracted to dirty fur. It is important you keep your rabbit and their housing clean and tidy.

After 33 years, we are saying goodbye to our Practice Manager, Jo Summerton. We know you will join us in wishing her the best of luck in her new ventures!

We've had a facelift!

CONGRATULATIONS

Congratulations to Charlotte.A who has recently qualified as a Registered Veterinary Nurse.

Charlotte has studied for 3 years, undertaking both practical and written exams.

Please join us in congratulating her in her new role as an RVN.
